DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 2, 5, 6, 9, 10, 12, 13, 17 – 22, 27, 29, and 34 are rejected under 35 U.S.C. 102(b) as being anticipated by Kanai et al. (JP Patent. 3566166386).

3. Kanai et al. teach a method of selectively removing lead dioxide coating on a titanium substrate by immersing in a solution of hydrosilicofluoric acid or its salt in the presence of acetic acid and hydrogen peroxide as a stabilizer for 10 to 20 hours at a bath temperature of 60 to 80 degrees C. Inherently all acids have a pH of less than 7 in pure water.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation

Art Unit: 2825

under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

6. Claims 7 and 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kanai et al. (JP Patent. 3566166386) in view of O'Brien (US Patent 5817182).

7. Kanai et al. teach the features previously outlined, but lack *in situ* formation of the hydrosilicofluoric acid.

8. However, O'Brien teaches *in situ* formation of hydrosilicofluoric acid by reacting silicon dioxide with hydrogen fluoride (col. 2 lines 47 – 55).

9. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to incorporate the teachings of O'Brien into the Kanai et al. method for *in situ* formation of hydrosilicofluoric acid. Provision for adjustability where needed involves only routine skill in the art. *In re Stevens*, 101 USPQ 284 (CCPA 1954).

Double Patenting

10. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Art Unit: 2825

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

11. Claims 1 –13, 17 –22, 27, 34 –36, 42 –47 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1 –14, 17 –23, 27, 28, 30 –32 and 34 of copending Application No. 09/771,186. Although the conflicting claims are not identical, they are not patentably distinct from each other because the applications are directed to removal of a coating using a fluorometal acid.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

12. Claims 14 –16, 24 –26, 28, 30 –33, 37 –41, and 48 are objected to as being dependent upon a rejected claim, but would be allowable if rewritten in independent form.

Remarks

13. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.
